Don't let IT to become a stumbling block in your business growth

Directpath Consulting LLP

Our Professional Consulting Services:

♦ Performance Engineering:

Performance has become a key element to the Business Growth. Let your systems be Web based, Client-Server Architecture or Virtualized Servers, we will tune it to the Business expectations under this core service. Thus, enabling your business to grow "N" fold.

We can test your applications using automated testing tools for ensuring the application scalability, identifying and fixing issues such as Memory Leaks, CPU spikes which are under peak users load (also known as Stress Testing).

We can check your application changes or releases from Quality per se (QA) of the code or releases.

♦ IT Architecture Design and SI:

Want to design a new IT Architecture for your existing business?

Going for IT expansions? Not Sure about which Hardware/Server/Storage to be purchased? Want to implement Disaster Recovery (DR) site?

Looking for Hardware Sizing & Capacity Planning solutions?

Yes, our expert Design and System Integration (SI) consulting service will help you to get the correct IT Architecture & well sized Hardware with proper capacity to support the Business growth down the line. So, you need not worry about the hardware / IT part of your business. Thus, you can focus more on your core business.

♦ Business Intelligence (BI):

Business Analytics has gained a huge importance over last decades. You can take business decisions based on the data extracted from the Data Warehouse (DWH) by querying the old historic data.

Our service will help you to Design, Build and Implement a Data Warehouse for your business requirements. We will also help to design the reports for extracting the key decision factors such as Q-to-Q growth, sales across regions, revenues across products etc.

We will help to tune the existing DWH reports / queries for optimal performance and resource utilizations.
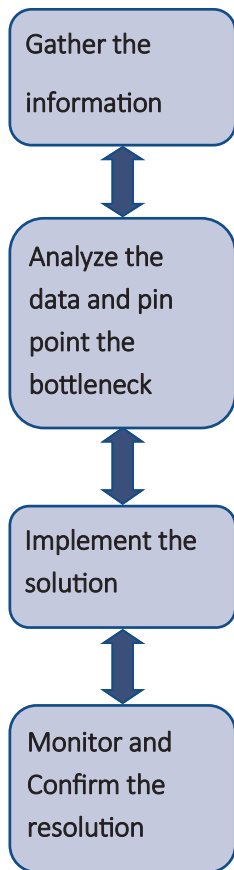

♦ Custom IT solutions and Education:

Do you need a customized IT solutions which is suitable to your business need? Not able to get solutions from the standard products?

Yes, we will give you a custom IT solution which will be designed to suite your requirement. Also, we can enhance the functionality of your existing solution according to the business expectations, performance and scalability per se.

Apart from that we can give corporate training to your IT teams to make sure that they are on the leading edge of the technology and make use of that technology in your daily IT needs. Thus, helping your business to stay ahead in technology.

Our Approach:

```
┌─────────────────┐
│  Gather the     │
│  information    │

♦ Case Study: A major public sector bank in India

Problem Background:

A leading government public sector bank in India faced problem of slowness of their Core Banking Application daily during business hours. This had impacted thousands of customers of the bank across the India and slowly bank started to lose their business due to this issue.

Solution:

Our expert team exactly pin pointed the issue and fixed the same by working with their Database Vendor. We monitored the system for next few weeks and confirmed the problem resolution. Now, branch users can perform their business operations without slowness during business hours.

Business Benefits:

The fixing of the Performance issue of the Core Banking application has made the Bank to give more services to their clients more efficiently. Also, bank could migrate all their Branches to the Core Banking application after fixing the performance issue.

Now, bank can offer more products and services to the clients and this has improved bank's revenues and client base as well.

♦ About our Consulting Services:

Our professional consulting services are carefully designed based on the real world scenarios and cases which are best suited for new edge IT solutions. Our services are aimed to deliver business benefits to the clients and thus enabling their business growth.

♦ About Us:

We are a team of professionals based in Bangalore, India, with IT experience over a decade and worked with major clients in Banking, Healthcare, Retail domains in India, APAC and USA (North America) for their IT consulting requirements.
